REMY DE LA CRUZ

remydlc@gmail.com | [linkedin.com/in/remydlc](https://www.linkedin.com/in/remydlc)

CLEARANCE: TS/SCI WITH FULL SCOPE POLY (FSP)

TECHNICAL SKILLS

- **Cloud Infrastructure:** AWS (S3, Lambda, CDK, CloudFormation, EC2, EMR, VPC), IaC, CI/CD
 - **Systems & Automation:** Linux/UNIX Administration, Python, Bash, Ruby, TypeScript, LVM, Patch Management
 - **Containers & Monitoring:** Docker, Kubernetes, Jenkins CI/CD, Prometheus, Grafana, Gitea
 - **DevSecOps & Cyber Security:** Security Automation, Traffic Analysis (Wireshark), Splunk, QRadar, NMAP, OS Hardening, Linux Systems Internals
-

PROFESSIONAL EXPERIENCE

AMAZON WEB SERVICES (AWS)

Amazon Dedicated Cloud Engineer II | *August 2024 - Present*

- Architect, deploy, and maintain mission-critical AWS infrastructure across government-dedicated partitions, ensuring seamless integration between cloud and on-premises environments.
- Implement a cross-domain alarm synchronization framework in TypeScript and Java across more than 50 distinct services, ensuring real-time status alerts mirror flawlessly between highside and lowside environments.
- Build advanced security automation workflows and conduct rigorous technical compliance reviews to align large-scale deployments with strict government security benchmarks.
- Implement Infrastructure as Code (IaC) architectures using AWS CDK and CloudFormation, including custom automated patching pipelines for EC2 and EMR clusters.
- Foster engineering excellence by facilitating technical training and hands-on mentorship for junior team members.

Systems Engineer II - S3 | *January 2021 - August 2024*

- Practiced strict DevOps methodologies to automate infrastructure orchestration and region build-outs utilizing Python, TypeScript, and Ruby.
- Designed and executed an automated filesystem cleanup and fleet maintenance system that successfully reclaimed an average of 8 engineering hours per month.

- Investigated global system variances and service interdependencies across complex configurations, resolving high-severity anomalies before customer impact.

Support Engineer IV - S3 | *April 2019 - April 2021*

- Built production-ready scripts for automated risk mitigation and redundant task elimination, ensuring operational efficiency for core S3 architectures.

RAYTHEON

Cyber Security Analyst | *February 2016 - March 2019*

- Performed comprehensive network and host traffic diagnostics using advanced monitoring tools (Splunk, Wireshark, QRadar) to isolate signature-related anomalies and IOCs.
- Designed and deployed custom internal traffic evaluation utilities, streamlining incident response timelines and providing stakeholders with crisp technical analytics.

NBC UNIVERSAL - COMCAST / COMPUCOM

Senior Storage / UNIX Engineer | *October 2005 - March 2019*

- Directed operational support, security patching, and configurations for a global storage environment spanning 100+ Petabytes and 300+ appliances.
- Managed a diverse infrastructure footprint of 2,000+ servers, utilizing custom Bash tools to automate OS hardening and backup verification.

PROJECTS & LABS

Home Laboratory Infrastructure

- Engineered a robust home infrastructure combining Docker containers and Kubernetes clusters managed via automated Jenkins CI/CD deployment pipelines.
- Orchestrate production-ready pods hosting self-contained cloud services (Nextcloud), Git source control (Gitea), and comprehensive Prometheus/Grafana analytics.

EDUCATION & CREDENTIALS

B.S. in Software Engineering | *Expected 2027*

Western Governors University

- **Professional Trainings:** AWS Instructor-Led Training (Security Engineering, DevOps Engineering, Running Containers on EKS), Red Hat Certified Engineer (RHCE) Training, CISSP Coursework, Checkpoint System Engineer (CCSE).
